

**WALLER
MARINE**

Since 1974

**NAVAL ARCHITECTURE & MARINE ENGINEERING
SINGLE SERVICE & TURNKEY INTEGRATED SOLUTIONS**

INVENTIVE, CREATIVE, PRACTICAL

Inventive

Waller Marine can push the technological envelope with new and different ways of doing things. Example left: Waller Marine's concept of a **TOTALLY GREEN Coal Gasification Quadruple Purpose Floating** that can generate electricity with hydrogen, provide enhanced oil recovery with CO₂, produce fresh water and produce gasoline.

Creative

Practical

Waller Marine is a world leader in the creative design, engineering and construction of power barges. Example above: The world's largest floating power plant, a 220 MW Combined Cycle FFP installed at site. This large capacity plant is transportable and able to be moved where needed quickly.

Waller Marine supports the marine offshore and transportation industry operations technically with modifications and upgrades ensuring compliance by working with all classification societies and with international and federal regulatory agencies.

Naval Architecture & Maritime Engineering

Single Service and Turnkey Integrated Solutions

With a highly diverse and experienced group of professionals, Waller Marine is well-positioned to manage the many services needed for a total solution or to provide a single service to meet the offshore needs of companies anywhere in the world. Our clients include those engaged in:

- Drilling
- Exploration
- Offshore Support Services
- Construction
- Ocean Transportation
- River Transportation
- Diving Support

During Waller's 30-years-plus of operation, Waller has successfully ridden the wave of the oil and gas, and transportation industries, both domestic and foreign. We have experienced owning and operating our own shipyards, building tugs and barges and offshore support vessels, as well as production platforms and conversions of naval vessels for commercial use. That wealth of experience remains with us today for the benefit of our clients in a wide variety of services.

- Integrated Services
- Naval Architecture
- Marine Engineering
- Technical Support
- Technical Software
- Marine Salvage
- Regulatory Compliance
- Special Projects

Ready to Serve with Professionalism and Integrity

Integrated Services

Management – Concept – Design –
Engineering – Procurement –
Construction – Regulatory
Compliance – Delivery –
Commissioning

- EPC Contracting
- New Vessel Construction
- Vessel Conversion, Modification & Upgrade
- Project Management
- Project Development

Project Management:
130 MW Diesel Powered
Delivered to the Philippines

Project Management:
35 MW Power Barge – Design,
Engineering, Construction and
Delivery to Lagos, Nigeria.

EPC Contract: 100 MW
Barge Mounted Circulating
Fluidized Bed, Coal Fired
Power

Engineering and Project
Management: 220 MW Combined
Cycle Power Barge for Hyundai
Engineering

Naval Architecture Services

The Traditional – The Specialized – The Impossible

- Classic Naval Architecture
- Ship Design
- Stability Analysis
- Hull Structures
- ANSYS Structural Analysis
- Vibration Analysis
- Mooring Analysis
- Speed & Power
- Propeller Design

ANSYS Structural Analysis: An
integral part of Waller Marine's
naval architecture services

500,000 BBL Shuttle
Tanker – Gulf of Mexico:
Integrated Tug Barge
System

MV. "Fugro Explorer"
Offshore Coring Vessel.
Consulting & Modification

5,000 Ton Per Day Gas to Methanol
FPSO: Designed and model-tested
the world's largest proposed
floating methanol plant ship for
the US DOT.

The FLNG "Margaret Hill" -
Proposed to be the first LNG vessel
to liquefy, store & unload LNG.

Setting the Standard for High Quality Naval Architecture and Marine Engineering Services

Marine Engineering Services

Propulsion – Positioning – Cargo Handling – Piping – Electrical

- Ship Propulsion Systems
- Dynamic Positioning Systems
- Repowering
- Liquid Cargo Handling Systems
- Bulk Cargo Handling Systems
- Shipboard Piping & Electrical Systems

Technical Support Services

Drawings – Manuals – Approvals – Supervision – Surveys

- Production of Working Drawings
- Operating Manuals
- Plan Approval for Class
- Construction Supervision
- Dry Dock Surveys
- Condition Surveys
- Valuation Surveys
- Hull Gauging
- Draft & Deadweight Surveys
- Inclining Experiments

Technical Software Services

The Latest Engineering Software – Modeling – Training – Manuals

- 3-Dimensional Vessel Modeling
- Training Programs
- Operations Manuals
- Quality Manuals

Developing Unusual Solutions to Meet Industrial Protocols and Regulations

Marine Salvage

Vessels – Drilling Rigs – Barges – For Owners and Salvors

- Marine Response Planning
- Preparation of Salvage Plans
- Vessel Salvage Implementation

Regulatory Compliance Services

Federal – State – Local – Third Party

- USCG Compliance Audits
- USCG 30 Year Survey & Structural Assessments
- Fire & Safety Plans
- Saturated Diving Systems
- Class Society Compliance
- IMO Compliance

Special Projects

We do our Best to Meet your Special Needs

- Project Cargo Tie-Down Analysis
- Bridge Construction Technical Support
- Hydrographic Data Acquisition
- Power Generation Facilities Installation
- Legal Support - Expert Witness
- Shipbuilding Facility Design

For your Naval Architecture and Maritime Engineering needs, from a single service to the very large and complex that possibly has never been done before, call, email, fax or write Waller Marine.
